

Putting the Medical ID Feature on Android Phones

Android phones usually don't have built in health apps that allow you to create a Medical ID. But people with Android phones can still create Medical IDs that anyone can see from the lock screen without unlocking the phone. There are apps you can download that can give you a Medical ID. You can look on your own for one that you like. The rest of this guide will show you how to make a Medical ID using the free app Medical ID (Free) ICE Contacts.

1:

First, you need to download the app. Go to the app store and download

(Medical ID (Free)
ICE Contacts)

2:

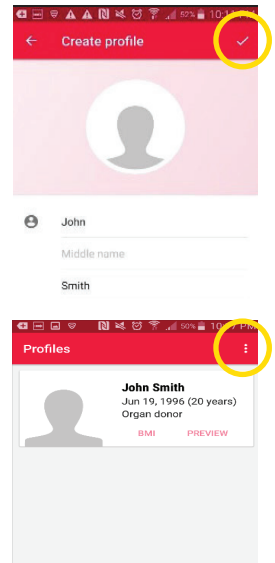

Open the new app, and you can create a profile. Fill out the profile with as much as you want, which includes: first name, last name, gender, birthday, blood type, height, weight, organ donor, medical conditions, allergies & reactions, medications, and medical notes.

3:

Then, tap the check mark in the upper right corner to finish the profile. Your Medical ID is ready!

You'll see a screen with all the profiles, like this one. Tap on the three dots upper right to change any settings.

This is the settings menu. Tap on Lock Screen to see the different options for Medical ID.

You can try them all and see which you like best. Lock your phone to see what they look like.

Here is what the "Floating icon" looks like when the phone is locked:

To see your Medical ID, tap twice on the red icon at the top.
